

**Adverse Weather Conditions - Golf Course Inspection and Course Closure Procedure**

In the event of adverse weather conditions affecting the Golf Course, the following procedures will apply:-

- (i) The Course Manager is authorised to have sole discretion whether the Golf Course should be open or closed for play;
- (ii) When the Course Manager has deemed it necessary to close the Golf Course but where, in his view, he considers that there is potential to re-open the course during the day:
  - (a) An announcement on the course status will be made at 07:00 and no earlier and will be published on Club V1; this will indicate if the Golf Course will be closed all day or if it will be closed pending a further inspection or inspections;
  - (b) Inspection times will be set at 08:00, 09:00 & 10:00 at which times the Course Manager will determine the status of the course conditions;
  - (c) If the course remains closed at the 0800 and 0900 inspections, the Course Manager will make a final decision at 10:00 which will be published on Club V1;
  - (d) If the course re-opens, the Course Manager will state on Club V1 the course re-opening time and tee times for the remainder of day will be honoured. Any players booked prior to the course re-opening will be able to re-book tee times providing they are available.
